Subject to misprints

Your benefit:

- Comfortable set in the system case
- Choice between centring vices optima 80 / 150 or 80 / 200 with a clamping power of up to 28 kN
- Repeatability of 0.01mm
- Patented flushing borehole for process-integrated cleaning of the vice
- One pair each of hardened stepped jaw and soft jaws in the set
- Double pendulum jaw system for the first/blank clamping, including accessories
- This makes stamping and thus a stamping station unnecessary
- No life-cycle costs, for example through worn stamping jaws
- No system dependency
- No additional working steps such as milling of clamping surfaces or stamping
- Cost reduction in the purchase of materials
- One vice for the first and second clamping
